Wendy McFadden-Smith  
Tender Fruit and Grape IPM Specialist

# New products

- Intuity
- Property (U8)
- Cosvet
- Vegol

# INTUITY™ FUNGICIDE

- New Group 11
- Control of Botrytis
- 439 mL/ha
- Max 4 apps
- 10 day PHI
- Locally systemic, protectant & residual control

# INTUITY™ FUNGICIDE

- Caution tank mixing with pesticides, surfactants or fertilizers
- Some phytotoxic effects when mixed with organosilicone surfactants

- U8
- Powdery mildew
- Translaminar and vapour effect
- Most effective with a surfactant
- Protective, post-infection

- Application to immature chasmothecia (cleistothecia) reduced maturation by 50% and reduced viability of ascospores by 30%.
- Application to mature chasmothecia after dispersal also reduced ascospore viability three-fold, although this was not statistically significant.

- 80% sulphur
- Nanotech small size particles
- Improved coverage
- Easy mixing
- 0.420 kg/100 L water (12.6 kg/ha)

# VEGOL<sup>®</sup>

FUNGICIDE/INSECTICIDE/MITICIDE

- 96% canola oil.
- dormant and summer oil
- 2% v/v solution
- Maximum 2 dormant and 4 summer apps/yr
- Mites, mealybugs, scale, phylloxera (?)
- Powdery mildew suppression
